

Buderus Serial Numbers:

Buderus product serial numbers are required for warranty issues, rebates, spiffs and promotions. Buderus serial numbers are displayed in many locations, and are easily found if you know where to look. Buderus serial numbers for boilers and tanks each consist of 18- 27 digits with clear, consistent patterns divided by dashes. The format for the serial number depends on the product manufacture date.

1. The first format of a Buderus serial number looks like this:

63036333-00-7080-3241
 A B C D

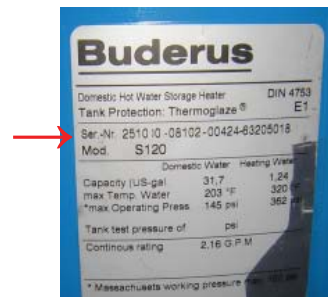

- (A) The product part number- *this is an ST200 DHW Tank*
- (B) Product version or series and consist of two digits- *this was in the 00 series of boilers.*
- (C) Manufacture date- *this tank was manufactured on the 80th day of 2007*
- (D) Manufacturing date Sequence (four or five digits)- *code for the identifying the the series of boilers made that day.*

2. The second format of a Buderus serial number (may show an “)” in section A only) looks like this:

253000-08065-00040-77470007254
 A B C D

- (A) Manufacturing location- *the location code was 253000 for this boiler (there are many different locations)*
- (B) The year and day of the year the product was manufactured- *the boiler was manufactured on the 65th day of 2008.*
- (C) Sequence count- *this product was the 40th produced on that day.*
- (D) The final section is the product part number- *this boiler is the G125BE/ 21.*

Please Note: Each of the sections are crucial to make a unique serial number. If only part of the serial number is provided there is the probability that it will be a duplicate.
